Thursday: 8am-7pm
Friday: 8am-7pm
Saturday: Closed
Sunday: Closed

ABOUT US

At the Advanced Headache Center, our treatment plans are uniquely designed to treat the individual suffering from headaches. We understand headache triggers and work with each patient to formulate a plan that will be unique to their condition. Our headache doctors provide a comprehensive diagnostic work-up and review of health history prior to setting a treatment plan. Many patients have seen a doctor in the past for their headache but have simply not found lasting relief. Fortunately, our headache doctors are skilled in a multimodal approach to accurately diagnosing and treating your pain. Successful headache treatment means:

- Accurately diagnosing each patient
- Recognizing other medical conditions and individual triggers for each patient
- Determining previous treatments attempted; what worked, what did not
- Modifying existing treatment or creating one
