Jatin Solanki

**Principal Consultant
Finance**
Ankit Sethiya

**Business Development
Executive**
Aniket Shah

Tech Lead
Sandip Prajapati

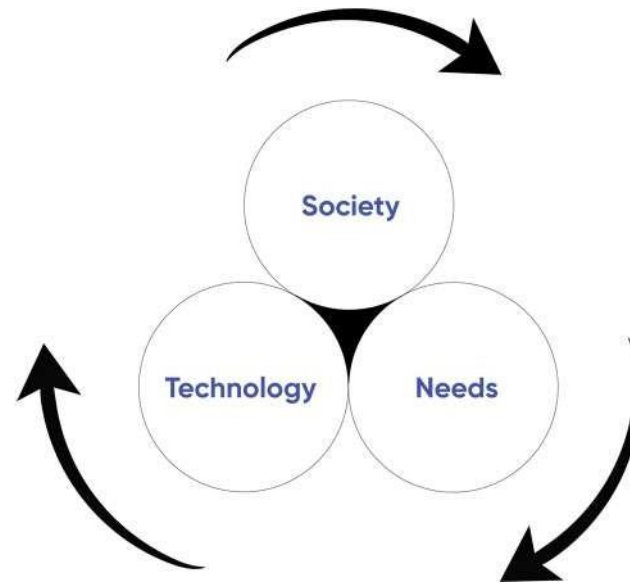

Project Lead (BPM)
Bhavik Nakum

Designer
Kushal Delvadiya

Philosophy

- Technology has driven every civilization, society, kingdom, and empire through history. Likewise, technology has positively impacted human life since antiquity by solving problems associated with everyday life and by making different tasks more manageable.
- Social activities such as communicating, traveling, learning, doing business, staying healthy, and being convenient have been made easier with technology. Getting further ahead on society and its needs, new technology will always be invented to serve new purposes or make life easier.
- However, despite the community and its needs managing to overlap the technology, there always falls a void wherein it becomes difficult to make any innovations reach out to make living easier. Tech Yantra is helping businesses overcome that void. We believe in bridging the gap where everyone has overlooked any possible technological up-gradation or automation. When developing new processes to speed up tasks and operations, we listen to what society needs, ultimately helping companies develop fool-proof ecosystems to sustain their business model.

Services

Development & Solutions

- UI / UX
- Frontend Technology
- Backend Technology
- Mobile Technology
- CMS

Business Process Management

- Data Integration
- Data Migration
- Data Entry & processing
- Data Conversion
- Data Cleansing
- Data Visualization
- RPA (Robotic Process Automation)

Brand Communication
