About Us

World-class optometry and ophthalmology care and cutting-edge technology distinguish Eye Physicians. Our New York City ophthalmologists and optometrists trained and served as educators at some of the world's most esteemed and highly regarded academic institutions.

NYC Eye Physicians are proud to be on USA Newsweek's list of 350 best ophthalmologists and optometrists. Using the latest advancements and techniques in optometric practices, our doctors offer a full range of Optometry & Ophthalmology services, from eye exams and treatment for dry eyes, burning eyes, and eye stye to an accurate assessment of refractive errors, like nearsightedness/farsightedness/astigmatism, and eyeglasses or contact lenses. At Manhattan Eye Physicians, you'll find the individualized, compassionate and patient-centric Optometry & Ophthalmology care you need in the safe, reassuring hands of eye experts.

To provide more comprehensive eye care, our optometrists use the newest diagnostic equipment available in the USA, such as Optical Coherence Tomography (OCT), Digital Slit Lamps, Automated Phoropters, Zeiss Visual Field Analyzers, VT1 Vision Screeners and Retina Cameras. These technologies offer earlier detection of various eye-related conditions and improved patient outcomes.

Conveniently located in the NYC Downtown, the Eye Physicians centers boast state-of-the-art, certified, and approved optometry and ophthalmology facilities. Visit our office near you and meet our eye specialists Richard F. Spaide, MD, Michael J. Cooney, MD, MBA, and William Hogue, OD, to experience skill, knowledge, and compassion. For excellent patient care, make your appointment today at (212) 292-4814.
